In this Article, we described strain YIM 93972 as representative of a new species in a new archaeal genus for which the name *Actinoarchaeum* was proposed.

We would like to make readers aware that after publication of this Article, it was brought to our attention that the name *Actinoarchaeum* was not correctly formed according to the rules of the International Code of Nomenclature of Prokaryotes. The correct name of the genus, *Actinarchaeum*, has now been validated¹.

In addition, we wish to clarify that Professor Aharon Oren (mentioned in the Acknowledgements section of this Article) did not propose the incorrect name *Actinoarchaeum*, but the correct one, *Actinarchaeum*.
